

Description

- * Standard cabinet-type CD, MP3 (with USB and SD card interfaces) and radio integrated playback equipment.
- * Provide a combined audio source for the broadcasting system, and manually control the CD, MP3, Bluetooth and radio players.

Features

- * Standard cabinet-type design (1U), black alumina brushed panel, humanized drawing, exquisite craftsmanship, showing high-grade temperament.
- * Built-in USB interface / SD card slot, CD movement and radio, Bluetooth four audio sources, CD player and MP3 player share one channel output, radio and Bluetooth share one channel output.
- * CD uses high-end suction movement.
- * The radio uses a high-sensitivity radio module; FM and AM (AM / FM) stereo two-band reception is optional, and the radio frequency memory can be stored up to 99.
- * With infrared remote control function, and can independently control the volume control.
