

Public Address / Voice Evacuation System

VX-3000 Series

Combined highly integrated voice evacuation
and public address system

Combined highly integrated voice evacuation, public address and BGM system.

Safety is an important issue more than ever.

Our VX-3000 is a reliable and energy-saving voice evacuation system certified on the European Standard EN54-16. It combines a lot of functions for PA/VE/BGM applications in one single VX-3000 Frame. The reduction in the number of components required allows for a non-complex design and a much quicker and easier installation together with space saving and a reduction in cable runs and complexity. This enables rapid system configuration and makes the VX-3000 a cost-effective system.

It includes low loss modular class D amplifiers with 3 different output ratings. These can easily be removed or mounted simply by unplugging them so there is no need for special tools. By using low loss modular class D amplifiers and modern power supply switching technology, the system becomes much more energy efficient and enables low operating costs.

Due to its flexible and scalable system architecture, the VX-3000 system can be used for both small and large applications, with up to 1280 remote microphones, 1,920 audio inputs and 2560 speaker zones. The system can be installed centralised as well as de-centralised, latter can reduce the cabling cost drastically.

The automatic emergency announcements (pre-recorded messages) can be arranged in three phases, for example broadcasting a coded message first, then a warning and at the end an evacuation message. A simultaneous broadcast of warning and evacuation messages is also possible and can be initiated by a single activation. Since version 5 the system allows the setting of a sequential evacuation which is required sometimes in a big building complex.

The two remote microphone models can be set for normal, emergency and both modes with a different setting for the talk button (implemented zone selection or not, PPT or lock mode).

In emergency mode, emergency messages can manually be assigned to broadcast areas. Built-in chimes or individually recorded chimes or tones can be set before and after paging, and different tones for normal and emergency broadcasts.

Different access levels (since version 5) restrict the access to the setting software according to the operator's education level. So the advanced user level allows the end user the setting of the built-in timer (since version 5) and changing audio files for general broadcasts, such as pause chimes in schools and factories, or general or advertisement announcements in shopping areas.

Also, the VX-3000 system passed the test on EN 50121-4 successfully. This standard covers the high EMC requirements for installations in railway stations.

Please contact your nearest TOA sales office for further information.

TOA's VX-3000 Series, IP-3000 Series and NX-300 got certified with EN 50121-4 (IEC62236-4), the electromagnetic standards which applies to a signaling and telecommunication apparatus installed in railway environment. Those systems can be utilized in railway applications where EN 50121-4 is required.

EN 54-16 specifies requirements, test procedures and performance characteristics for speech alarm control panels for use in fire detection systems installed in buildings where the alarm signal is transmitted in the form of tones and/or as a spoken message.

Certification No: 1134-CPR-195

Features

Flexible Broadcasting

Broadcast of many different audio signals to multiple zones simultaneously, flexible speaker driving

- | Broadcast initiation patterns: Remote microphone key operation, VX-3000CT key operation, internal timer, voice activation and more.
- | Selectable audio sources: Live announcement, pre-recorded message, music, and more.
- | Multi-phased priority setting

High Sound Quality & Intelligibility

- | Comprehensive DSP functions for inputs and outputs including automatic feedback suppressor
- | Automatic output volume adjustment depending on the ambient noise level (Ambient Noise Control function)

Ideal for Small to Large Scale Applications

- | Minimized configuration - All functions, all inputs and outputs are incorporated in one VX-3000 Frame.
- | A small number of system components helps easy system configuration.
- | Scalability - One large-system with maximum 2560 speaker zones and 1280 remote microphones is possible.

Features

Reliability

- | Certified to EN 54-16
- | Redundant system configuration - network connection, standby amplifier setting and backup power supply.
- | Advanced failure detection
- | Fault indications assignable to control outputs, remote microphone function keys, VX-3000 Frame's LEDs, buzzers, e-mail notifications, etc.

Redundant amplifier

A standby amplifier can be shared among the multiple VX-3000 Frames.

Redundant network

Redundant LAN connection can be configured for more reliable system.

Integration

- | Connectable with TOA's NX-300 Network Audio Adapter and IP-3000 Series IP Public Address System
 - | Remote Protocol enables VX-3000 to be controlled by external devices.
- Furthermore, VX-3000 complies with Modbus protocol.

Eco-Friendly

- | Light-weight and energy saving - Modern power supply switching technology and power efficient digital amplifiers
- | Battery saving - Standby function for low power consumption during battery backup reduces the required battery capacity

Intuitive, yet Sophisticated Setting Software

- | Setting software provides different modes according to the user role or level.

Features

Extreme Flexibility

The underlying VX-3000 Frames of the system are selectable according to the required broadcast pattern.

Requirements

- The floor is divided into four zones.
- Each zone needs individual background music
- Announcement is sent to selected zone(s)
- Background music is overridden by announcement

VX-3004F

- ! Up to 4 modular amplifiers mountable
- ! Multi-route architecture
- ! Each zone has an exclusive amplifier
- ! One of mounted amplifiers can serve as a standby amplifier

Requirements

- The floor is composed of multiple zones.
- Common background music is delivered to all zones
- Announcement is sent to selected zone(s) without disrupting the background music in the other zones.
- Background music is overrode by announcement

VX-3008F

- ! Up to 3 modular amplifiers mountable, one of which serves as a standby amplifier
- ! 2 bus lines and 8 switching zones
- ! One amplifier covers multiple zones

Requirements

- The floor is divided into multiple zones with individual attenuator
- No background music required
- Announcement is sent to selected zone(s)

VX-3016F

- ! Up to 2 modular amplifiers mountable 16 switching zones
- ! Broadcasting to multiple zones with only one amplifier is possible

*SS stands for speaker selector

In case of connecting music source, be noted that background music is interrupted by paging announcement.

Flexible speaker driving from 1 zone per amplifier up to 64 zones per amplifier

1 zone per amplifier

Features

Scalability

One system can be configured with max 40 frames, one of which is set to ID:0 and serves as a master frame. Up to 4 systems can be integrated via LAN, allowing to configure one large-scale system with maximum 1,920 Audio Inputs and maximum 2,560 speaker zones.

Maximum System Capacity	
Output Power	320,000 W
Speaker Zones	2,560 *1
Remote Mics	1,280

RM-200SF Wall Mount Remote Microphone RM-320F Extension

RM-200SF

Alarm Switch

Microphone

RM-320F

- Wall mount remote microphone for emergency and general broadcast
- Zone selection or all call
- VX-3000 setting software permits desired functions to be assigned to individual function keys (equipped with 2 LED indicators)
- CPU-switch for emergency broadcast to all zones even in case of a CPU error
- RM-320F: Key extension unit with 20 additional keys
- Up to 4 RM-320F Extension units can be used with each RM-200SF Remote Microphone

Specifications	RM-200SF	RM-320F
Power Source	24 V DC (operating range: 15 – 40 V DC), supplied from the audio input unit	-
Current Consumption	240 mA or less	180 mA max. (in terms of RM-300MF)
Distortion	1 % or less	-
Frequency Response	200 Hz – 15 kHz	-
Signal-to-Noise Ratio	55 dB or more	-
Audio Output	0dB V, transformer-balanced	-
Microphone	Unidirectional dynamic microphone with talk key, AGC (ON/OFF switchable), microphone element failure detectable by using a built-in small oscillator	-
Volume Control	Microphone volume, Monitor speaker volume	-
Connection Cable	Shielded CPEV cable (each one pair of audio wire, data wire, monitor/ control wire, and power supply wire) or Shielded Category 5 twisted pair cable (CAT5-STP) or greater, M3 screw terminal	Connection to RM-200SF by dedicated cable
No. of Connectable RM -320F	Max. 4 units	-
Key Operation	Emergency key, Talk key, 3 Function keys	20 Function keys
Finish	ABS resin, bluish gray (PANTONE 538 or its equivalent)	
Dimensions (W x H x D)	200 x 215 x 95 mm	175 x 215 x 70 mm
Weight	1.48 kg	700 g
Applicable Box	Wall mounting box: YS-11A	-

RM-300X Remote Microphone RM-210F Extension

RM-300X

RM-210F

- Desktop microphone for both general and emergency broadcast
- Zone selection or all call
- VX-3000 setting software permits desired functions to be assigned to individual function keys (equipped with 2 LED indicators)
- RM-210F: Key extension unit with 10 additional keys
- Up to 7 RM-210F Remote Microphone Extension units can be used with each RM-300X Remote Microphone
- Can be mounted on the wall by using optional wall mounting bracket WB-RM200.

Specifications	RM-300X	RM-210F
Power Source	24 V DC (operating range: 15 - 40 V DC, supplied from the voice evacuation frame) or DC input power supply connector (when the optional AD-246 power supply unit used.)	Supplied from the optional RM-300X
Current Consumption	240 mA or less	80 mA or less
Audio Output	0 dB(*1), 600 Ω, balanced	-
External Microphone Input	-40 dB(*1), 2.2 kΩ, unbalanced, ø3.5 mm phone jack (2P) for electret condenser microphone, (phantom power supply:3 V DC) -20 dB(*1), 4.7 kΩ, unbalanced, ø3.5 mm phone jack (2P) (AUX Input)	-
Frequency Response	100 Hz – 20 kHz	-
Distortion	1 % or less	-
Signal-to-noise Ratio	60dB or more	-
Microphone	Unidirectional electret condenser microphone with AGC (ON/OFF selectable)	
Chime	Built inside (PCM sound source), Monitoring possible using built-in speaker	
Level Control	Microphone sensitivity control, Monitor speaker volume control, Chime(adjustable using the software)	-
Connection Cables	Main line: Shielded CPEV cable(1 pair of audio wire + 1 pair of data wire + 1 pair of monitor/control wire + 1 pair of power supply wire) or Shielded Category 5 twisted pair cable(-CAT5-STP) or greater, Branch line: Shielded Category 5 twisted pair cable (CAT5-STP) or greater, RJ45 connector	
No. of Connectable RM-210F	Max. 7 units	-
Operation	Function switch, Covered switch, Broadcast switch	Function key x 10
Finish	ABS resin, black	
Dimensions (W x H x D)	190 x 76.5 x 215 mm (gooseneck microphone excluded)	110 x 76.5 x 215 mm
Weight	880 g	350g
Option	Remote microphone extension: RM-210F, Wall mounting bracket: WB-RM200 Electret condenser microphone: WH-4000A, YP-M101, YP-M301 etc.	Wall mounting bracket: WB-RM200

RM-200RJ Terminal Unit

- Convert the RJ45 connector into a screw terminal block
- Used to connect between a trunk cable (such as CPEV cable) and a feeder cable (such as CAT-5 or CAT-6 cable) in wiring a remote microphone
- Built-in indicator shows the voltage status of DC power cable when the remote microphone cable for the VX-3000 series system is connected.

VM-300SV End of Line Unit

- Speaker line failure can be detected with high accuracy
- Module for installation between the speaker line end and the emergency input terminal of the VX-3008F and the VX-3016F.
